

## CALL FOR PARTICIPATION

# The Blizzard Challenge 2018

## Evaluating corpus-based speech synthesis on common databases

Simon King, Alan W Black and Keiichi Tokuda

January 2018

In order to better understand and compare research techniques in building corpus-based speech synthesisers on the same data, the annual Blizzard Challenges 2005-2017 were held. We are now pleased to call for participation in the thirteenth challenge: Blizzard Challenge 2018. The basic challenge is to take the released speech data, build synthetic voices, and synthesise a prescribed set of test sentences. The output from each synthesiser is then evaluated through extensive listening tests. The following is an outline description of the challenge – for full details and the rules of participation, please see the web pages.

- **Single task 2018-EH1: UK English Children’s Audiobooks** - About 6.5 hours of speech data from professionally-produced children’s audiobooks will be released. This is the same data as used in last year’s Blizzard Challenge. All data are from a single speaker. The task is to build a voice from this data that is suitable for reading audiobooks to children.

**Blizzard Workshop:** The systems will be presented by the participants at the Blizzard Challenge 2018 workshop, which we will be held in Hyderabad, India, just before or after Interspeech 2018.

They should identify a contact person in their team, and provide email and postal addresses. A registration fee is payable for each system submitted for evaluation – details can be found on the website.

**Licenses:** The license for the released data can be found via the Blizzard website. Data will be released to each participant once the appropriate license has been agreed to.

**Mailing list:** It is essential to join the blizzard-discuss mailing list, which is used to send important information to participants. Instructions are on the Blizzard website.
