

CALL FOR PARTICIPATION

The Blizzard Challenge 2016

Evaluating corpus-based speech synthesis on common databases

Simon King, Alan W Black and Keiichi Tokuda

February 22nd 2016

In order to better understand and compare research techniques in building corpus-based speech synthesisers on the same data, the annual Blizzard Challenges 2005-2015 were held. We are now pleased to call for participation in the eleventh challenge: Blizzard Challenge 2016. The basic challenge is to take the released speech data, build synthetic voices, and synthesise a prescribed set of test sentences. The output from each synthesiser is then evaluated through extensive listening tests. The following is an outline description of the challenge – for full details and the rules of participation, please see the web pages.

- **Single task 2016-EH1: UK English Children's Audiobooks** - About 5 hours of speech data from professionally-produced children's audiobooks will be released. This includes the approx. 2 hours of pilot data from last year's Blizzard Challenge. All data are from a single speaker. The task is to build a voice from this data that is suitable for reading audiobooks to children.

Blizzard Workshop: The systems will be presented by the participants at the Blizzard Challenge 2016 workshop, which will be held in the USA as a satellite of the Speech Synthesis Workshop.

Registration: Interested parties should register as soon as possible, by mailing blizzard@festvox.org. They should identify a contact person in their team, and provide email and postal addresses. A registration fee is payable for each system submitted for evaluation – details can be found on the website.

Licenses: The license for the released data can be found via the Blizzard website. Data will be released to each participant once the appropriate license has been agreed to.

Mailing list: It is essential to join the blizzard-discuss mailing list, which is used to send important information to participants. Instructions are on the Blizzard website.
